## VARSITY

ADMISSION TEST PREPARATION

**Dear HSC Candidates,**

At the outset, warm wishes from the **MEDICO** family to you for choosing the noble profession of becoming a doctor as the goal of your life.

Many of you might be wondering how exactly should you prepare to reach the doorstep of fulfilling your dream. To be honest, for those of you who have cherished the dream of becoming a doctor from childhood, nothing else compares to the emotions and passion you feel for this profession. In recent years, Medical Admission Test has been held first ahead of all other university admission tests. For example, 2024-25 academic year's Medical Admission Test was held on January 17, 2025, and 2023-24 academic year's exam took place on February 9, 2024. So, there was ample time after medical exam to prepare for other university exams. Therefore, when preparing for Medical Admission Test, you should avoid making any decisions that might endanger this prime goal of your life. All questions in the Medical Admission Test are based strictly on the main textbooks, with a strong emphasis on factual informations. Thus, your preparation should be structured in a way that you can fully complete your preparation for medical admission test first, and then prepare for university admission exams later. It is seen that in every aspect of life, those who had stayed focused on a specific goal are the ones who succeeded. Therefore, you should enroll in an institution that will properly guide you towards achieving your main goal of becoming a doctor, without overwhelming you with excessive pressure from various other subjects, and thus help you reach the threshold of success. Choice of institution for medical admission preparation should depend on the organization's past experience and proven success. Students currently studying in various medical and dental colleges can provide the best advice on where you should enroll. Before making a decision, seek out information from your seniors in college about where they received the best guidance. You must decide based on previous years' statistics and experiences about which institution thoroughly teaches main text books. Hopefully, considering current scenario, everyone will recommend **MEDICO** as a top institution. Due to **MEDICO**'s unique and effective courses, just like in previous years, our students of 2024-25 academic year have achieved remarkable success in securing admission to government medical colleges. Based on our long-standing experience and careful observations, we once again express our firm commitment to provide you with the highest support in 2025.

Therefore, we warmly invite those whose first and foremost dream is to become a doctor to join **MEDICO**.

**Dr. Jobaidur Rahman Jony**

Founder and Chief Executive Officer, **MEDICO**

## **Dear Students and Respected Guardians,**

Warm greetings and heartfelt regards from **MEDICO!**

In response to current competitive landscape, **MEDICO** has comprehensively restructured all departments to ensure that students of 2025 batch receive the best possible preparation for Medical Admission Test in Bangladesh.

### **What MEDICO Offers for 2025 Medical Aspirants : From start to finish, Blend of merit, experience, and dedication**

Throughout every phase — from initiation to completion of academic course—planning and execution are directly overseen by **MEDICO's** Founder and CEO, **Dr. Jobaidur Rahman Jony**, alongside a team of senior teachers. This ensures a flawless integration of academic excellence into every step.

Our course curriculum is strategically designed to not only complete the entire syllabus but also allow students to revise it three to four times, incorporating stress management techniques and targeted exam strategies.

### **Top Teacher's Panel to Complete Topics Within the Classroom:**

In a competitive exam like medical admission, only experienced and senior teachers can effectively guide and thoroughly teach students. At **MEDICO**, every lecture is delivered under supervision of senior faculty members.

For 2025, key lectures will be conducted by:

**Biology:** Dr. Zobaidur Rahman Jony,

**Chemistry:** Dr. Ibrahim Khalil Roni,

**Physics:** Engineer Faisal Haidar, along with other highly experienced top teachers.

While assembling such an expert team is unimaginable elsewhere, **MEDICO** has made it a reality to help students achieve their dream of becoming doctors.

### **Only at MEDICO:**

#### **Thorough Teaching Based on Main Textbooks :**

Over the past years, medical admission questions have consistently been sourced directly from Intermediate textbooks. Hence, **MEDICO's** academic activities are centered around these textbooks. We firmly believe that a student prepared on the foundation of main textbooks will achieve excellent results in Medical Admission Test. At **MEDICO**, lessons are meticulously taught and key parts of textbook are highlighted. All practice exams are also based strictly on the textbooks, resulting in a high number of common questions in the final exams.

### **MEDICO's Unique Initiative-Marked Main Textbooks :**

Highlighting important parts and lines of main textbooks is personally overseen by **MEDICO's** Founder and CEO, Dr. Jobaidur Rahman Jony. This year, particularly in Biology, textbooks from multiple authors are being carefully marked. A simple comparison with other institutes' highlighted books will clearly reveal uniqueness and effectiveness of **MEDICO's** editions. You can view samples of **MEDICO's** highlighted textbooks on our Facebook page or website.

### **Class Lectures Designed for Maximum Learning Support:**

At **MEDICO**, each subject's teaching approach focuses on how to study effectively and how to retain information in less time. Along with highlighting key textbook sections, essential explanations are provided. Students are also taught memorization techniques directly during class. Using multimedia projectors, key topics are thoroughly discussed to ensure clear conceptual understanding. Unlike other institutions where class time is often wasted on highlighting, **MEDICO** prioritizes deep learning and understanding throughout the entire class session.

### **The Highest Number of Medical Standard Exams at MEDICO :**

From start to finish, every exam question at Medico is prepared under direct supervision of Dr. Jobaidur Rahman Jony and academic team of senior teachers. As a result, **MEDICO** maintains strict admission-test standards across all practice exams, leading to a high number of common questions in final exams. This systematic approach has been crucial in producing outstanding results among Medico students. An analysis of past medical admission exams will clearly show how consistently **MEDICO** upholds the highest standards — samples and detailed solutions are available on our Facebook page and website.

### **Regular English and General Knowledge Classes and Exams from Day One:**

In the medical admission test, there are 25 marks allocated to General Knowledge and English. At **MEDICO**, students can easily secure 22–23 marks out of 25 in the final examination. To achieve this, **MEDICO** conducts regular classes and assessments in General Knowledge and English from the very beginning. For 2025 batch, students will receive over 30 offline and online classes covering both Bangladesh and international topics, ensuring that **MEDICO** students maintain a significant advantage in General Knowledge over others.

## Unique Exam System and OMR

### -Based Answer Sheet Evaluation

At **MEDICO**, every exam answer sheet is evaluated using OMR machines. This ensures that students can be assessed from the beginning on their ability to correctly fill out answer circles and manage their time effectively during exams. Based on marks obtained in each test, merit lists are published, and results are automatically sent to students and their guardians via SMS.

## **MEDICO Conducts Highest Number of Structured Exams**

- **Daily Exams** : Every day, 100-mark Daily Exam will be conducted based on previous classes. Each exam includes 80 marks of MCQ questions and 20 marks of SAQ (short-answer questions) for written assessment.
- **Review Exams** : After completing several lectures, 100-mark Review Exam will be held on corresponding chapters.
- **Monthly Exams** : At the end of each month, 100-mark Monthly Exam will cover all chapters taught during that month.
- **Trial Exams** : After a fixed number of lectures, Trial Exam will be held at external venues for students from all branches, with a national merit list published.
- **Special Exams** : 50-mark Special Exam will be conducted daily based on recent lessons.
- **Interphase Exams** : A total of 26 exams, each of 100 marks, will cover multiple chapters from each subject to ensure in-depth preparation.
- **Model Test and Final Model Test Exams** : In final phase, students will participate in national-level Model Tests, where final merit positions will be determined across all **MEDICO** branches.

## **Regular Parent-Teacher Meetings for Transparency and Accountability**

Regular meetings will be organized to keep guardians updated about their child's academic progress and to gather valuable feedback for further improvement. We believe that collective teamwork between students, parents, and **MEDICO** is the key to guaranteed success.

## Newly Updated and Expanded

### **Academic Materials : 13 Books and More**

#### • **Companion Books (4 Books)** :

For Botany, Zoology, Chemistry, and Physics, notes compiled from multiple authors will be provided to make comprehensive study easier within a short time.

#### • **Let's Practice Books (4 Books)** :

Chapter-wise and topic-wise sample questions will be given for Botany, Zoology, Chemistry, and Physics, enabling students to practice and self-assess. All exercises from NCTB-authorized textbooks will also be included.

#### • **General Knowledge Book** :

A newly updated General Knowledge book will be provided, integrating both Bangladesh and international information as per latest medical admission exam requirements. Medico's GK book alone is sufficient for Medical and Dental exam preparation.

• **English Book**: **MEDICO**'s English book includes extensive grammar rules along with ample practice questions, combining past questions from Medical, Dental, University, and BCS exams.

• **Question Bank**: A comprehensive Question Bank consisting of questions from past 20 years of Medical and Dental admission exams, arranged chapter-wise and topic-wise, providing an excellent tool for targeted practice.

• **Quick Revision Books (2 Books)**: For final 30 days of preparation, students will receive special English and General Knowledge notes titled "Quick Revision," personally compiled by **MEDICO**'s Founder and CEO. Historically, a significant number of actual exam questions have matched directly from these notes.

## **24/7 QnA Support**

### **via MEDICO's Dedicated Server**

All **MEDICO** students have access to 24/7 QnA support system. Under the supervision of Teachers' Panel, students can log in using their roll number and serial number to ask questions at any time and receive quick solutions.

## **Intensive Course for Final Revision**

After completion of regular course plan, **MEDICO** will offer an intensive revision phase. It will include solving mathematical problems and MCQs from Chemistry and Physics, classes based on renowned books by Alim Sir and Azibur Sir for Botany and Zoology, and specialized study technique sessions under CEO's Talk series. Each class will be followed by separate exams to solidify preparation.

### Discuss Your Problems Directly with MEDICO's Subject-wise Mentors

Alongside 24/7 QnA support service, students will have opportunity to seek assistance directly from subject-wise mentors. If a student struggles with any topic, they can discuss it over a phone call with a dedicated mentor for quick clarification and guidance.

### Extended Academic Support Until Other Competitive Exams

For MEDICO's regular students, following services are provided completely free of charge

1. Model Tests for Medical College Admission
2. Model Tests for Dental College Admission
3. Model Tests for Armed Forces Medical College Admission

### Awards and Recognition for Top Performers

To motivate regular and meritorious students, top performers in each Review Exam, Monthly Exam, Trial Exam, and Model Test Exam will receive prizes and certificates of excellence.

### Scholarships and Awards

#### for Success in Medical Admission Tests

MEDICO offers scholarships and attractive prizes to students who achieve top national rankings in final medical admission test, paving the way for a strong academic future.

- **1st Place in National Merit:** Scholarship of ₳ 2,00,000, Laptop, Honorary Crest, Apron, Special Gift
  - **2nd Place in National Merit:** Scholarship of ₳ 1,00,000, Honorary Crest, Apron, Special Gift
  - **3rd Place in National Merit:** Scholarship of ₳ 50,000, Honorary Crest, Apron, Special Gift
  - **4th to 10th Place in National Merit:** Scholarship of ₳ 30,000, Honorary Crest, Apron, Special Gift
  - **11th to 20th Place in National Merit:** Scholarship of ₳ 10,000, Honorary Crest, Apron, Special Gift
- Additionally, all students who secure admission to Dhaka Medical College, Sir Salimullah Medical College, Shaheed Suhrawardy Medical College, other government medical colleges, dental colleges, Armed Forces Medical College, and Army Medical Colleges will be honored with an Honorary Crest, Apron, and Special Gift. Moreover, a spectacular Grand Celebration Program will be organized for all students who successfully secure admission to government medical and dental colleges.

Follow **MEDICO's** official Facebook page to stay updated!

Students from various branches of Medico who secured admission to government medical and dental colleges in 2024–25 academic session.

**5. Storage of fats and amino acids:** Sugars that cannot be used by the body or not stored as glycogen are stored by the liver in the form fat. The liver also stores amino acids. According to body need, fats and amino acids are converted into usable glucose.

**6. Storage of Mineral:** The liver stores iron and potassium. In the breakdown of red blood cells, hemoglobin is broken down by **Kupffer** cells in the liver into **heme** and **globin**. The iron part in the heme is stored in the liver as **ferritin**. Also minerals like copper, zinc, cobalt etc. are stored in the liver in **small amounts**.

## Metabolic functions of the liver

The liver is the main organ in maintaining the internal balance of the body. It causes a variety of biochemical reactions that play an important role in the body's metabolism. The liver is the **major site of metabolism of carbohydrates, proteins and fats**. The following metabolic functions occur in the liver.

**1. Carbohydrate Metabolism:** The liver plays a major role in carbohydrate metabolism. Metabolism of carbohydrate in the liver is described below.

- **Glycogenesis:** Sugar (e.g., glucose) enters the liver through the **hepatic portal vein** from the intestine. This vein is the **only blood vessel that carries different levels of sugar**. The liver regulates glucose levels in the body at 90 milligrams per 100 cubic centimeters. Regardless of the type of food taken, the liver prevents blood glucose level from rising or falling. The liver converts all hexose sugars, including galactose and fructose, into glucose and stores them as **insoluble polysaccharides called glycogen**. The process of conversion from glucose to glycogen is called **glycogenesis**. The process is stimulated in the **presence of insulin**. Insulin is a hormone produced by the pancreatic **islets of Langerhans** in response to elevated blood sugar levels.
- **Gluconeogenesis:** The biochemical process that produces **glucose from non-carbohydrate precursors** is called **gluconeogenesis**. It is an anabolic metabolism of sugars/carbohydrates. It mainly occurs in the cytoplasm of liver cells. When the level of glucose in the blood decreases excessively according to the needs of the body, the liver produces glucose from amino acids, lactic acid, pyruvic acid, glycerol etc. and sends glucose to the blood, thus increasing the level of glucose in the blood. This process is stimulated by the hormone **glucagon**. Thus the liver plays an important role in maintaining normal blood glucose levels of 90 mg / 100 cubic centimeters.
- **Glycogenolysis:** When the level of **glucose in the blood decreases**, by the process of **glycogenolysis**, the glycogen stored in the liver is broken down into glucose and is absorbed into the blood. This process is influenced by the hormones **epinephrine and glucagon**.
- **Lipogenesis:** When blood glucose levels rise to such level that it exceeds energy production and glycogen storage capacity, the liver converts excess glucose into triglyceride under the influence of the hormone insulin. This triglyceride is stored in the cell as fat. That's why eating extra sugary foods increases blood triglyceride (TG) levels, which is a major risk factor of **heart disease and stroke**.

Difference between glycogenesis and glycogenolysis

Topic	Glycogenesis	Glycogenolysis
1. Nature	Glucose converts into glycogen	Glycogen breaks down to form glucose
2. Site	Liver	Muscle and liver
3. Initial reactant	Insulin	Glucagon
4. Importance	Decreases sugar in blood and maintains equilibrium	Increases sugar in blood (when sugar level decreases)

## 2. Protein Metabolism:

The liver plays a very important role in protein metabolism. The role is described under the following headings.

- **Deamination:** The process of **removing an amino group** from an amino acid or other element is called **deamination**. Excess amino acids taken with food cannot be stored by the body. The liver breaks down excess and unused amino acid by the process of **deamination** and produced **keto acid and amine group**

## Success 2023

In 2023-24 academic year's Medical Admission Test, our students secured top rankings, including 1st, 2nd, 6th, 7th, 10th, 14th, and 15th positions in the national merit list. Furthermore, a remarkable 107 students secured admission to Dhaka Medical College, and a total of 2275+ students got admitted to government medical colleges.

In 2023-24 Dental Admission Test, our students achieved top national rankings: 1st, 2nd, 3rd, 4th, 8th, and 10th. Overall, 278+ of our students got admitted to government dental colleges and units.

## Success 2022

In 2022-23 academic year's Medical Admission Test, our students achieved exceptional results, securing positions such as 2nd, 3rd, 10th, 14th, 15th, 16th, 17th, 20th, 24th, 25th, 28th, 30th, 32nd, 33rd, 35th, 40th, 43rd, 44th, 46th, 47th, and 49th in the national merit list. 103 of our students were accepted into Dhaka Medical College and a total of 2130+ students got admitted into government medical colleges.

In 2022-23 Dental Admission Test, we continue to thrive! Our students ranked with 2nd, 12th, 15th, 29th, 33rd, 39th, 42nd, 44th, and 45th positions on the national merit list. 203+ students gained admission to government dental colleges.

## Success 2021

In 2021 Medical Admission Test, our students secured top rankings, including 1st, 2nd, 6th, 8th, 12th, 21st, 22nd, 23rd, 24th, 25th, 26th, 37th, 38th, 39th, 42nd, 43rd, 47th, and 48th positions in the national merit list. 109 students secured admission to Dhaka Medical College and a total of 2265+ students got admitted to government medical colleges.

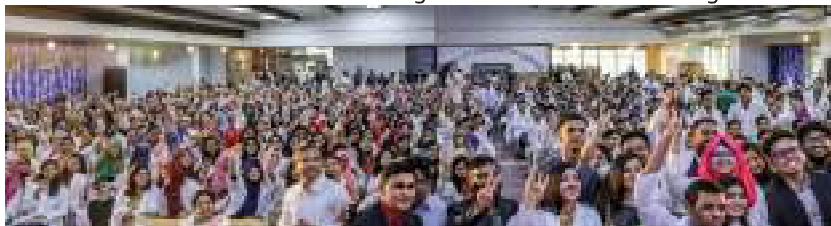

In 2021 Dental Admission Test, our students performed well, with 3rd, 4th, 5th, 8th, and 9th positions. A total of 225+ students were admitted to government dental colleges.

## Success 2020

In 2020 Medical Admission Test, our students achieved numerous successes! They secured top rankings, including 4th, 5th, 6th, 8th, 9th, 12th, 13th, 17th, 22nd, 24th, 25th, 27th, 30th, 34th, 35th, 36th, 37th, 38th, 39th, 40th, 42nd, 44th, 46th, and 48th in the national merit list. 107 students were accepted into Dhaka Medical College and a total of 2155+ students got admitted to government medical colleges.
